SPACESHIP TRAVEL
ABOUT THE EARTH

Greetings, space explorers! I am the captain of the HumanSpaceStar1, my very own spaceship. After exploring the galaxy, I've gathered some amazing facts about the Earth and I'm excited to share them with you!

The Earth travels 67,000 mile per hour. While a racecar's max speed is 200 miles per hour. Earth is the only planet in the Solar System that has water in it's 3 states: solid, liquid, gas. Earth is the only planet know to have life. It is also filled with Nitrogen and Oxygen. At first Earth's atmosphere was filled with Methane, Carbon Dioxide, Nitrogen, Carbon Monoxide, Ammonia etc., but no Oxygen. The Earth has uneven amount of Gravity. From up in my spaceship it looks like a swirl of Blue, Green, White. The Earth is about the same size as Venus, sometime the Earth is referred to Venus as the kind twin. Scientists believe that the Earth is 4.5 billion years old, my grandpa would not have lived that long. Earth is the 5th Largest planet in the solar system. Earth has 6 layers called Inner Core, Outer Core, Lower Mantle, Upper Mantle, Crust, and Atmosphere. The inner and outer core is a total of 2200 miles thick, both the mantles in total is 1800 miles, while the crust the strongest but thinnest is 0-100 km. The Earth is not a sphere, it is a obiate spheroid. The distance between the Sun and the Earth is 147 to 152 million km. Earth's axis is tilted 23.4 degrees. This tilt is what is causing the seasons. One day on Earth rounded to the nearest ten is 24 hours but the actual time is 23 hours an 56 minutes. A year on earth is 365.26 days.

I think the Earth is coolest Planet ever because it has people and living things in them.

Do you agree? Let's keep exploring the universe together! 🚀🌍

Picture of me

My name is: Amaan Edavalath

My age: 10

My school: Everyday Ibaadah Academy / EDIA

My teacher's name: Mr. Yusuf

My favorite books:

Matilda, Charlie and The Great Glass Elevator, Charlie and The Chocolate Factory, All the Geronimo books.

The Wind In The Williows.

My favorite activities:

Chatting with my friends and playing Soccer, Basketball, Golf and Swimming.

IS THE EARTH THE COOLEST PLANET IN THE SOLAR SYSTEM?

EARTH IS STUNNING

WITH BLUE OCEANS, GREEN FORESTS, SNOWY MOUNTAINS, DESERTS, AND COLORS
